

Pump In Style® Troubleshooting

1. Help! My breast pump doesn't power on / has no suction

1 Is your breast pump connected to power?

2 Try an alternate power source - when testing, use new batteries

3 Works with power adaptor but not battery pack **REPLACE YOUR BATTERY PACK**

4 Works with battery pack but not power adaptor **REPLACE YOUR POWER ADAPTOR**

5 Doesn't work with either power source **CONTACT MEDELA CUSTOMER SERVICE**

Pump In Style[®] Troubleshooting

2. Help! My breast pump has no suction, low suction or suction only on one side!

1 Turn your pump on.

2 Increase (+) vacuum to make sure it is not set too low for you to feel.

3 Check that all kit components are clean and dry with secure connections.

- Breast shield to connector
- Tubing to connector
- Bottle to connector

4 Open the connector

- Ensure the membrane placement is correct
- Close the connector & ensure the connector cap is tightly shut.

5 While pumping, check to see there is a complete seal around the breast with the breast shields. Make sure you are using the correct size, visit medelabreastshields.com for sizing information.

6 While pumping, check that the end of the tubing is plugged into the tubing port on the top of the pump.

7 If single pumping, insert the unused tubing end into the tubing holder.

8 If suction does not improve contact Medela Customer Service.
